Item No.7: Approval of Online Evaluation Guidelines from BR23 Regulations.

Proposal for Digital Evaluation from BR23 Regulations

EXISTING EVALUATION SYSTEM	PROPOSED EVALUATION SYSTEM
1. Existing evaluation system is Manual Valuation.	1. Proposed valuation System is Digital Evaluation.
2. Valuators are coming to the spot centre and valuating the answer scripts on the mentioned dates.	2. In this Valuation system Answer Scripts are scanned after the exam and uploaded in the software. We send a registration link to the valuator where he has to give his complete professional details and register. If we satisfy with the profile of the valuator we will approve him as a valuator in the software. Then we allocate the scanned copies of booklets through software. The valuator can do the valuation at his place only. We fix the dates in the software for valuation period. After that the valuator can't view the scripts.
3. Scripts are to be stored carefully	3. Once the scripts are scanned, they can be retrieved at any time from the data base.
4. some times long distance faculty may not show interest to do valuation as their physical presence is needed at the spot centre.	4. We can assign the valuation to anybody across the globe. Quality of valuation can be improved.
5. During revaluation time will be killed to search that answer script.	5. When a student is applied for revaluation automatically his/her script will be separated from the software.

All members expressed their willingness towards implementation of Digital Evaluation system from BR23 regulations.
